

SOLUTIONS FOR THE FOOD-PROCESSING INDUSTRY

The complete offer for optimal and risk-free production

NTN  **SNR**

www.ntn-snr.com

With You

NTN-SNR A LEADING PLAYER

An expert in Product Life Cycle Management, NTN Corporation is typified by the accessibility and commitment of its teams.

We anticipate development projects on your strategic markets. Our NTN and SNR brands contribute to the excellence of your machines, helping to promote them.

FOOD-PROCESSING: AN ENVIRONMENT WITH SUBSTANTIAL CONSTRAINTS

From the basic product to the finished product, thanks to our know-how we can offer you a range that is technically adapted to each of your constraints. To ensure your production process is sustainable and meets hygiene standards, we bring you optimal and customised solutions.

HIGH-PRESSURE WASHING

SUCCESS STORY

How does LUBSOLID® NTN-SNR improve the filling and capping operations of beverage production plants on the other side of the Atlantic?

The bottling line of a major beverage bottling and distribution site in Florida had broken down repeatedly. The loss of production had been put at €0,000 per month.

The local team therefore carried out a thorough assessment of the line and its 120 filling nozzles. It identified 20 monthly head failures that caused a machine shutdown of between 60 and 90 minutes. The cause: a lubrication fault.

THE NTN-SNR SOLUTION

On NTN-SNR's recommendations, the standard bearings were replaced with solid-grease bearings. These NSF-H1-certified food-grade solid grease self-aligning ball bearing inserts are made of stainless steel. In addition, they are protected by reinforced contact seals.

Direct washing represents a significant threat to the durability of production equipment. The resistance of LUBSOLID® products extends their service life by a factor of 20.

RESULT

95 % of machine failures and shutdowns have been eliminated.

Reduced downtime and lower maintenance costs have led to **a global saving of €183,000 per year**. It is no longer necessary to regrease the bearings, which saves valuable time for the maintenance

teams. The risk of chain contamination due to lubrication leaks was significantly reduced. For these reasons, the site has since converted all of its applications similar to our LUBSOLID® products.

ANNUAL SAVING ACHIEVED

MACHINE AVAILABILITY

-€120,000

MAINTENANCE COSTS

-€48,000

CONSUMPTION OF BEARINGS

-€15,780

TOTAL SAVED

-€183,780

DISCOVER

all our ranges for the food industry through our main business lines.

TOPLINE BALL BEARINGS

Designed for extreme temperatures

>>> Reduction of the machine shutdown time

6

THERMOPLASTIC MOUNTED UNITS

Specifically designed to prevent the collection of dirt

>>> Compliance with hygiene standards

8

STAINLESS STEEL MOUNTED UNITS

The ideal solution against humidity

>>> Increase in the service life of equipment

10

STAINLESS STEEL BALL BEARINGS

A shield against corrosion

>>> Reliability of the production chain

12

LINEAR AXIS AND BALL BUSHINGS

Designed to cope with demanding environments

>>> Reduced maintenance frequencies

14

LUBSOLID®, FOOD-GRADE SOLID GREASE

For faultless lubrication

>>> User comfort without maintenance

16

LUBRICATION SOLUTIONS

Adaptable to each application

>>> Optimal and secure solutions

21

TOPLINE BALL BEARINGS DESIGNED FOR EXTREME TEMPERATURES

TECHNICAL CHARACTERISTICS

- Special lubricants and sealings materials for use between -60 °C and 200 °C
- F600 and F604 ranges for very high temperatures (up to 350 °C)
- F6xx series with increased internal clearance to compensate for the effects of expansion

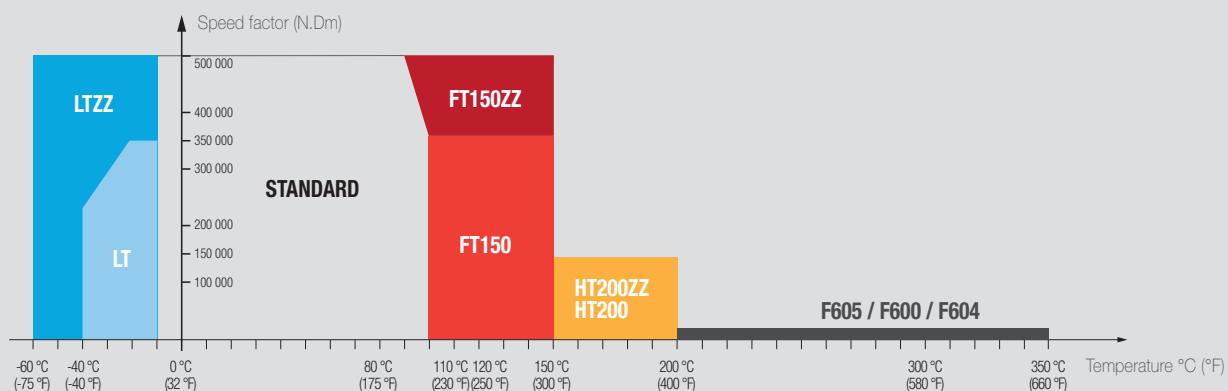

TEMPERATURES

FINE PARTICLES

BENEFITS

- Reduced number of machine shutdowns: time saving
- Firm control over your maintenance intervals thanks to consistent product quality

FT150 & HT200 ranges

These ranges offer optimal solutions for high temperature applications (maximum of 150 °C and maximum of 200 °C, respectively). The FT150 and HT200 ranges are perfect for the conveyors used in furnaces, dryers, broilers, ovens, etc.

LT range

Good performance at low temperature thanks to its specific type of grease. It also has good moisture resistance and is ideal for refrigeration environments in the food-processing industry.

F6xx range

Dedicated to applications at very high temperature (350 °C) and low speed (50 rpm maximum). For example, it is a component used in porcelain and building-material furnace trolleys. This range is therefore fully compatible with the highest-temperature kilns.

TECHNICAL CHARACTERISTICS

(Refer to pages 22-23 to discover the entire range)

Products	Cage	Internal clearance	Grease	Sealing	Other	Conditions of use
FT150 FT150ZZ	Steel	C3	Adapted to high temperatures	Fluorinated seals (FKM) or steel shields.	-	Maximum temperature: 150 °C (peak). Limiting speed: 500,000 N.Dm.
HT200 HT200ZZ	Steel	C4	Adapted to high temperatures	Fluorinated seals (FKM) or steel shields.	Specific heat treatment.	Maximum temperature: 200 °C (peak).
LT LTZZ	Steel	C3	Adapted to low temperatures and the presence of humidity. Lithium thickener + synthetic base oil.	Nitrile seals (NBR) or steel shields.	-	Low temperature down to -60 °C for LTZZ and -40 °C for LT. Limiting speed: 500,000 N.Dm.
F605	Steel	Multiple of C5	-	-	Brand is stamped.	Temperature range between 200 °C and 350 °C (continuous or in cycles). Limiting speed: 50 rpm. Moderate loads.
F600	Steel	Multiple of C5	-	-	Specific surface treatment (phosphatation + MoS2 deposit)*. Brand is stamped.	Temperature range between 200 °C and 350 °C (continuous or in cycles). Limiting speed: 50 rpm. Moderate loads.
F604	Steel	Multiple of C5	Suitable for very high temperatures. Polyalkylene glycol base oil + solid additive	Steel shields.	Specific surface treatment (phosphatation + MoS2 deposit)*. Brand is stamped	Temperature range between 200 °C and 350 °C (continuous or in cycles). Limiting speed: 50 rpm. Moderate loads.

* The specific surface treatment on the F600 and F604 ranges provides better resistance to oxidation and good lubrication capacity. In the case of the F600 range, a suitable quantity of grease can be inserted into the bearing if necessary. Contact NTN-SNR for more information.

DAIRY PRODUCTS

**THERMOPLASTIC MOUNTED UNITS
SPECIFICALLY DESIGNED TO PREVENT THE
COLLECTION OF DIRT**

HIGH PRESSURE
WASHING

CLEANING
AGENTS

HUMIDITY

HYGIENE STANDARDS

TECHNICAL CHARACTERISTICS

- Polyester housings: resistance to corrosion, mildew and cleaning agents
- Additional covers with radial lip seal: resistance to direct washing, even at high pressure
- Smooth sole surface to prevent the collection of dirt
- Stainless steel metal parts

BENEFITS

- Excellent internal and external protection
- Extra resistance during wash cycles
- Clean operating environment ensured

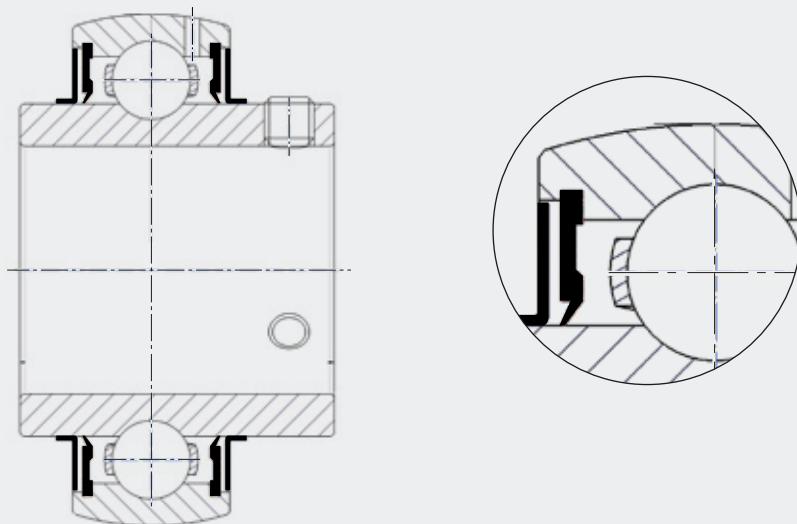

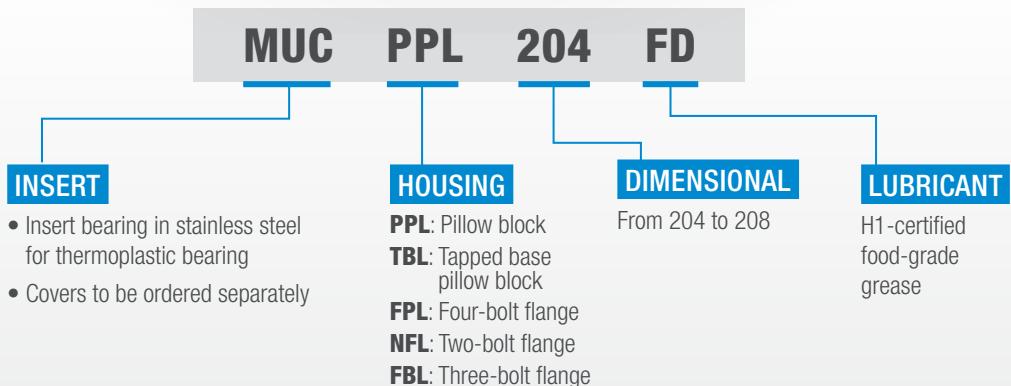

GOOD TO KNOW

The bearings are pre-lubricated with a paraffinic mineral oil and aluminium complex (odourless and tasteless) food-grade grease compliant with FDA regulations. This grease is classified NSF H1 - occasional contact with food.

AVAILABLE FLANGE BEARINGS

The inserts for the thermoplastic bearing range are available
with LUBSOLID® food-grade solid grease

MEAT

STAINLESS STEEL MOUNTED UNITS THE IDEAL SOLUTION AGAINST HUMIDITY

HIGH PRESSURE
WASHING

CLEANING
AGENTS

HUMIDITY

HYGIENE STANDARDS

TECHNICAL CHARACTERISTICS

- High-quality stainless steel (housing and insert)
- Additional covers with double lip seal: optimum resistance to direct washing, even at high pressure
- Insert equipped with shield + elastomer seal against humidity and dirt
- Compliance with ISO standards to simplify your maintenance operations

BENEFITS

- Protection against corrosion
- Absolute sealing of the bearing: prevention against external contaminants
- Interchangeability with standard bearings

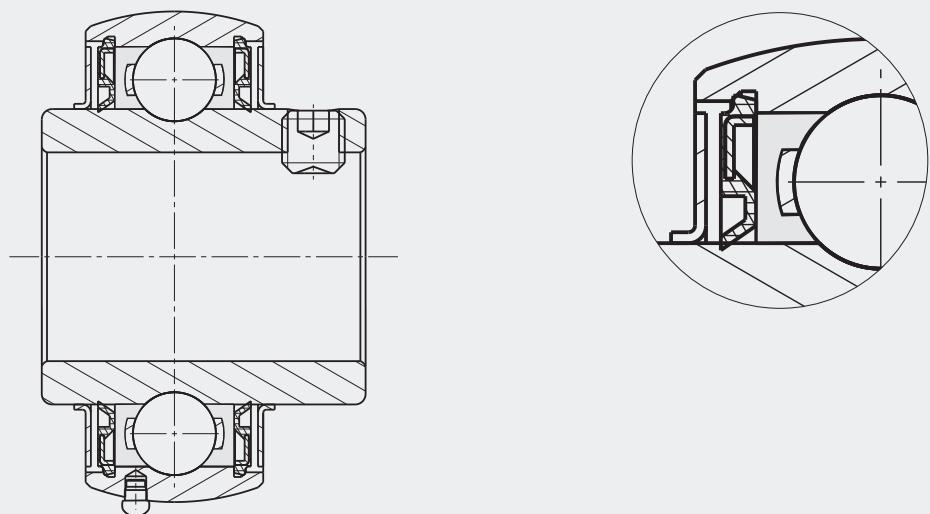

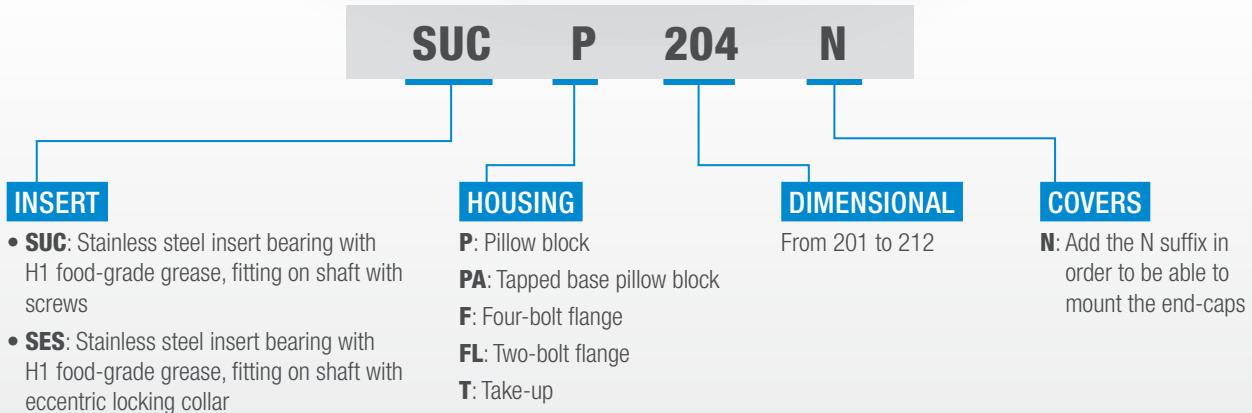

GOOD TO KNOW

The bearings are pre-lubricated with a paraffinic mineral oil and aluminium complex (odourless and tasteless) food-grade grease compliant with FDA regulations. This grease is classified NSF H1 - occasional contact with food.

AVAILABLE FLANGE BEARINGS

The inserts for the stainless steel bearing range are available
with LUBSOLID® food-grade solid grease

STAINLESS STEEL BALL BEARINGS A SHIELD AGAINST CORROSION

CLEANING AGENTS

HUMIDITY

HYGIENE STANDARDS

TECHNICAL CHARACTERISTICS

- High-quality stainless steel
- Available with reinforced elastomer seals (2RS) or stainless steel shields (ZZ)
- Food-grade grease compliant with USDA H1 standards
- Available for 6000, 6200 and 6300 series (shaft diameters from 10 to 40 mm)
- Load capacity identical to that of standard steel bearings

BENEFITS

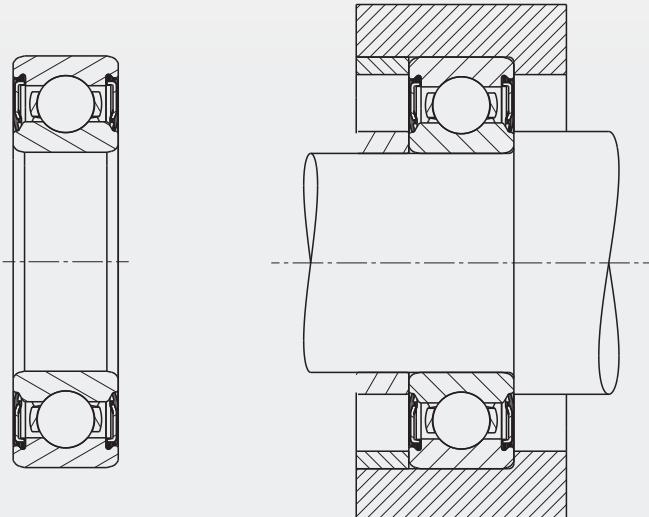

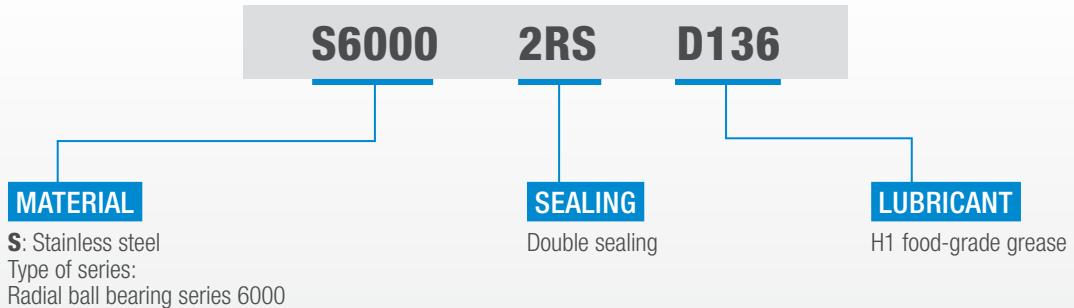

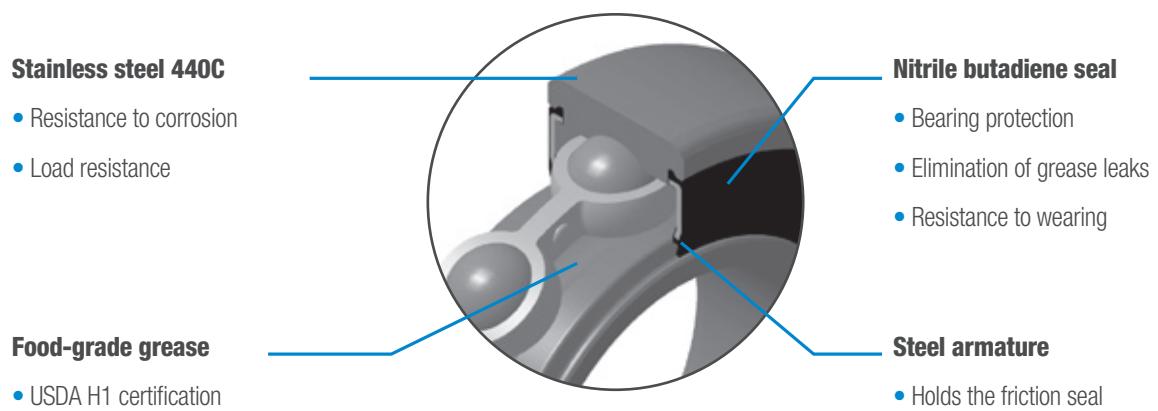

- Very good resistance to corrosion
- Excellent resistance to outdoor pollution
- Keeps the production chain clean
- Performance of your lines is guaranteed even during load peaks

X70

Up to 70 times more resistant to corrosion.

The stainless steel in our bearings is an ideal solution to ensure a long service life, even in the event of frequent washing.

STEEL QUALITY AND SEALING

FRUIT AND VEGETABLES

LINEAR AXIS AND BALL BUSHINGS DESIGNED TO COPE WITH DEMANDING ENVIRONMENTS

TECHNICAL CHARACTERISTICS

- One of the best seals on the market (dust, water, corrosion)
- Smooth profile surface to prevent the collection of residue
- High compactness and rigidity
- Easy relubrication possibility

BENEFITS

- Cleanliness of the production chain is always respected
- Reduced costs: easy installation and maintenance
- Tailor-made: dimensional constraints are taken into account

HUMIDITY

FINE PARTICLES

GOOD TO KNOW

NTN-SNR has supplied linear systems successfully since 1985. These products, designed and assembled in our Design Centre in Germany, constitute one of the most complete and most attractive ranges on the market.

LINEAR AXIS COMPACT MODULES

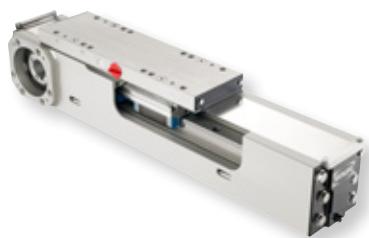

AXC RANGE

Sizes 40, 60, 80, 100, 120

The modular design permits the use of single modules or complex multi-axis systems

- Different guidance and drive options
- Omega drive: version with driven table

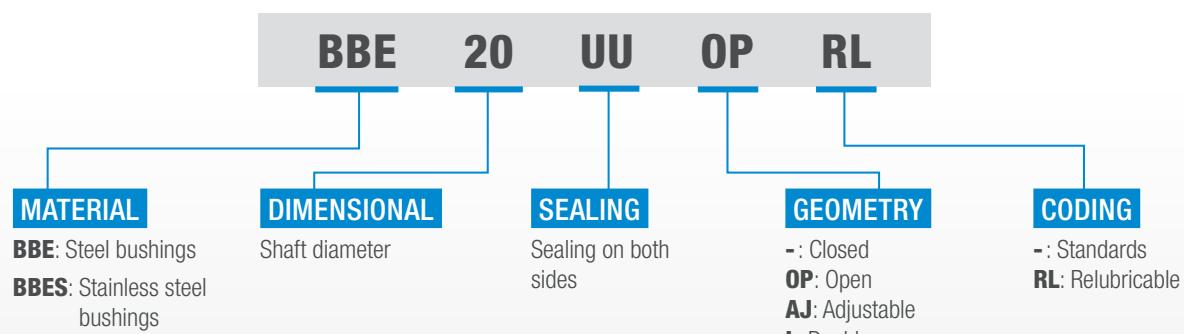

AXF RANGE

Size 100

Based on the AXC range

- Available with toothed belt drive and ball screws
- Specially developed range to prevent residue deposition in the profile
- Module specifically optimised for applications in the food, pharmaceutical and semiconductor industries

LINEAR BALL BUSHINGS

STANDARD BALL BUSHINGS

BBE RANGE/DIAMETER 3 TO 80 MM

Closed

Adjustable (AJ)

Open (OP)

Double (L)

Available in solid steel/
stainless steel cage
(e.g.: BBE(S)20AUU)

STANDARD FLANGED BALL BUSHINGS

BBER RANGE/DIAMETER 8 TO 60 MM

Flanged

Tandem Flanged (L)

Middle Flanged (M)

Only in sealed version
(e.g.: BBER20UU)

READY MEALS

**LUBSOLID[®],
FOOD-GRADE SOLID GREASE
FOR FAULTLESS LUBRICATION**

GREADED FOR LIFE

HYGIENE STANDARDS

TECHNICAL CHARACTERISTICS

- No empty space: the lubricant fills the whole of the bearing
- Grease compliant with FDA sanitary requirements
- No leakage of grease

BENEFITS

- Reduction in the number of machine shutdowns and, as a result, maintenance time
- Insert fully sealed against corrosion and pollution
- No relubrication or maintenance
- Cleanliness of the production chain is guaranteed

X20

LESS DOWN TIME, MORE PROFIT

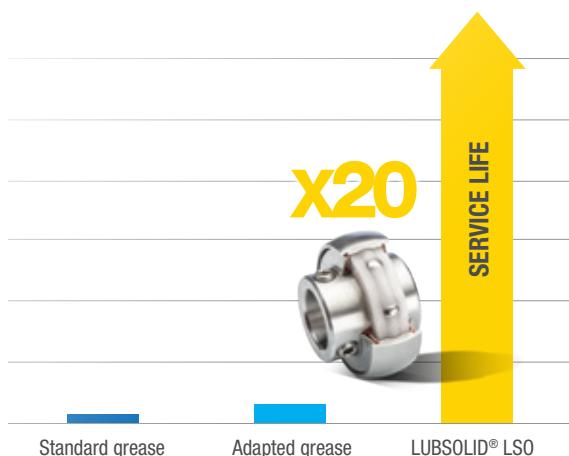

Thanks to LUBSOLID[®], you can extend the service life of a bearing by a factor of 20, compared to a bearing lubricated with a standard high-performance grease. Furthermore, the bearing does not require regreasing.

Specific solutions on request.

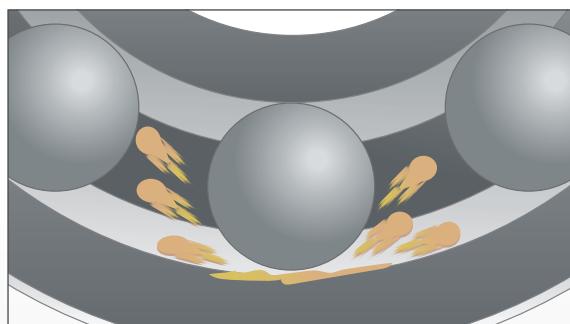

WHAT IS LUBSOLID® ?

The concept is that of a porous polymer matrix containing a large quantity of oil. This matrix fills the free space in the bearing fully, thereby preventing pollution and water from entering. Due to its solid nature, this lubricant cannot flow out from the bearing and ensures the cleanliness of your environment.

Such reliability lets you extend the service life of a bearing by a factor of 20!

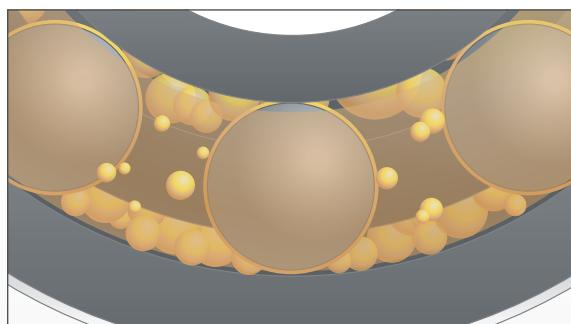

Lubrication with standard grease

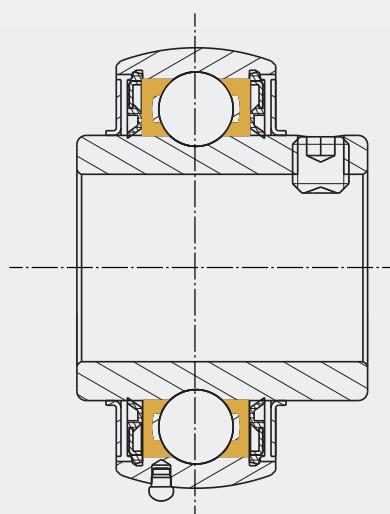

Due to mechanical and thermal stress, the grease is laminated and driven out of the contact surface between the rolling elements and the raceway. This loss demands frequent relubrication.

LUBSOLID® lubrication

LUBSOLID® cannot be ejected, it constantly supplies the bearing core with oil. This spells the end for shutdown and relubrication operations.

DIMENSIONS

Shaft diameter: 20 – 40 mm
Type of insert: SUC
Material: Stainless steel

Inserts available with our stainless steel and thermoplastic housings, see pages 24-28

BEVERAGES

LUBRICATION SOLUTIONS ADAPTABLE TO EACH OF THE APPLICATIONS

EASY INSTALLATION

HIGH RATES

TECHNICAL CHARACTERISTICS

- Compatible with several grades of grease (NLGI00 to NLGI2)
- Simultaneous lubrication of up to 35 lubrication points
- Constant output independent of the temperature

BENEFITS

- Speed and ease of installation
- Improves the safety of maintenance personnel

GOOD TO KNOW

55 % of premature faults that affect bearings are due to inappropriate lubrication and 17 % are due to incorrect mounting!

NTN-SNR offers support during mounting and removal as well as tools and equipment to make these operations simpler and safer.

Specific solutions on request.

MULTIPOINT

LOW-COST EASY TO IMPLEMENT CENTRALISED GREASING

Multi-point lubrication system (from 1 to 35 points) that increases the availability of equipment while reducing maintenance costs.

- 1** Determine the number of points that have to be lubricated, select the pumping elements and connect them.
- 2** Connect the pump to the electrical network.
- 3** Fill the tank with the selected grease.
- 4** Programme the lubrication cycles: the POLIPUMP is ready to operate.

SINGLE-POINT

THE CONSTANT AND REGULAR LUBRICATION OF BEARINGS

Optimises the greasing function without the need for any change to the installations.

READY BOOSTER

- Economical and flexible model
- For environments that are either humid, exposed to corrosion or require a maximum level of hygiene
- 60 cm³ and 125 cm³

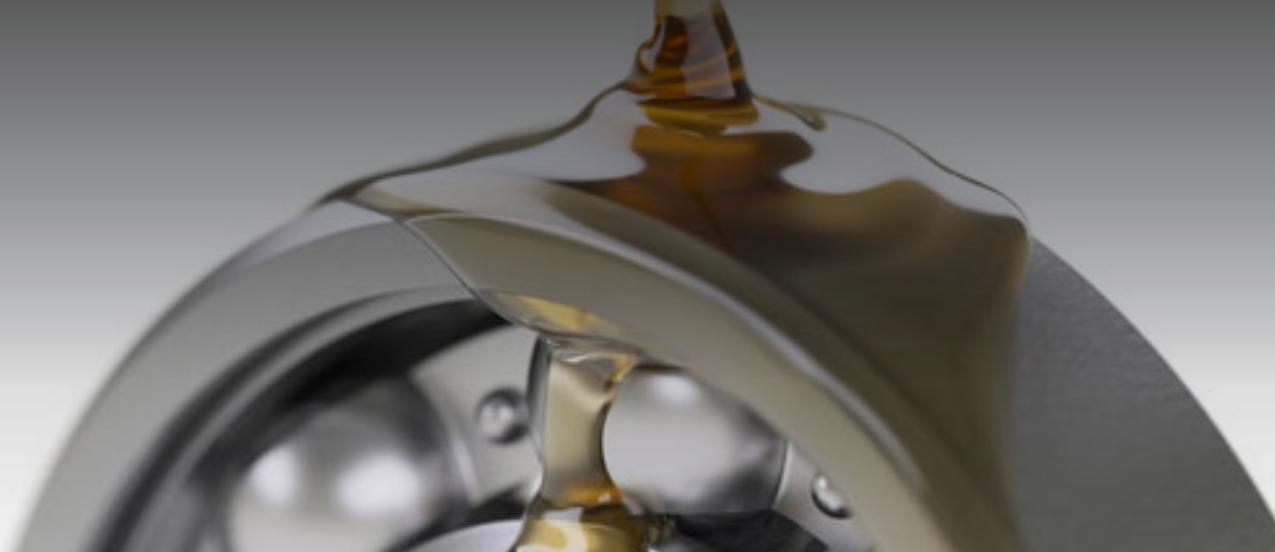

SMART BOOSTER

- Economical model independent of the temperature
- For applications subject to temperature variations
- 125 cm³

DRIVE BOOSTER

- High-end model for all situations
- Constant output, installation up to 5 metres from the lubrication point
- 120 cm³ and 250 cm³

LUBRICATION SOLUTION ADAPTABLE TO EACH OF THE APPLICATIONS

FOOD AL (-25°C to 120°C)

Grease and oil for all applications where accidental contact with food is technically possible.

BENEFITS

- Good protection against corrosion
- High resistance to washing with cold and hot water
- Robustness against disinfectants and detergents

FOOD CHAIN OIL (-30°C to 120°C)

Food-grade oil for chains and conveyors.

BENEFITS

- Excellent ageing and oxidation stability
- Good protection against wear, corrosion and seizing
- Neutral in relation to sealants and paints

ULTRA HIGH TEMPERATURE (up to 260 °)

Grease for long-term lubrication of all bearing types operating at extreme temperatures.

BENEFITS

- Good capacity to absorb pressure
- Excellent resistance to aggressive agents
- Compatible with most plastics

PRODUCT REFERENCES

TOPLINE BALL BEARINGS

- High temperature series FT150/FT150ZZ (max +150°C)
- High temperature series HT200/HT200ZZ (max +200°C)
- Low temperature series LT/LTZZ (from -40°C to -60°C)
- Very high temperature series F6XX (max +350°C)

22-23

STAINLESS STEEL MOUNTED UNITS

- Insert bearing with locking screw (SUC) – LUBSOLID® compatible
- With SUCP/SESP sole
- Flange bearing with 4 holes SUCF/SESF
- Flange bearing with 2 holes SUCFL/SESFL
- With sole with blind holes SUCPA/SESPA
- Take-up pulleys SUCT/SEST
- Protective covers SCO/SCC - SCOE/SCCE
- Insert bearings with eccentric locking collar (SES)

24-27

THERMOPLASTIC MOUNTED UNITS

- Insert bearings with locking screw (MUC) – LUBSOLID® compatible
- Flange bearing with 3 holes MUCFB
- Flange bearing with 4 holes MUCFP
- Flange bearing with 2 holes MUCNF
- With sole MUCP
- With sole with blind holes MUCTB
- CV/CF protective covers

28

STAINLESS STEEL BALL BEARINGS SEALED VERSION

- Series 6000
- Series 6200
- Series 6300

29

LINEAR MOTION

- Stainless steel linear bushings BBES
- Linear modules AXF

30-33

LUBRICATION SOLUTIONS

- Lubricants in cartridges or containers
- Single-point lubrication systems
- Multi-point lubrication system

LINEAR MOTION

LINEAR MODULES

AXF100Z

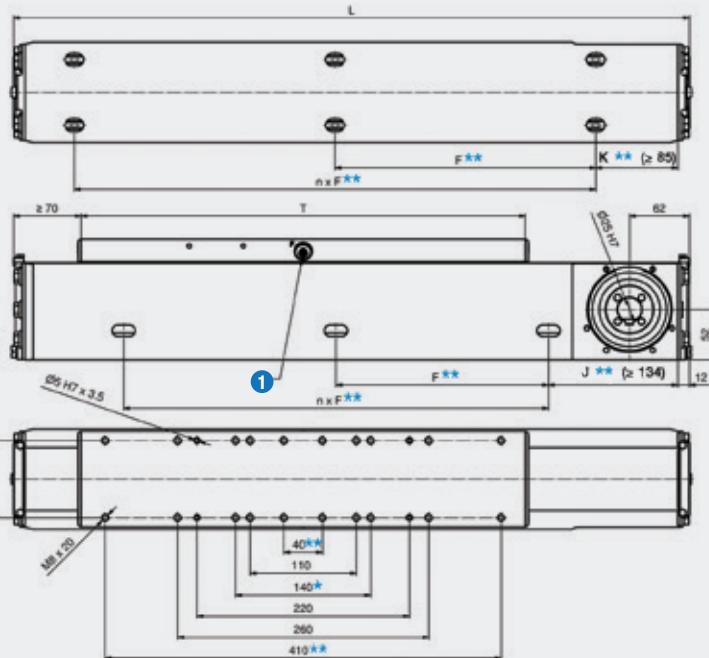

with toothed belt drive

T = Table length

S = Stroke

L = T + S + 140 mm

- ① Possibility of regreasing both sides

*Guidance system B, D, P

**Guidance system C

***Optional: Special measurements to be specified

Technical data

Type	Unit	Guidance system B	Guidance system C	Guidance system D	Polymer roller guidance P
Table length	mm	320	460	320	
Drive element				Toothed belt 40STD8	
Maximum speed	m/min		300		420
Allowable dynamic operation load	N			1 800	
Stroke length per revolution	mm			264 ^{+0,5}	
Idling speed torque	Nm			3,1	
Maximum drive torque	Nm			75,7	
Moment of inertia	Kg/cm ²			14,3	
Geometrical moment of inertia (profile) I _y	cm ⁴			381,3	
Geometrical moment of inertia (profile) I _z	cm ⁴			514,0	
Max total length ¹	m			6,0	
Repeatability	mm			0,05	

¹ - Greater length possible on request

Static load capacities

Type	Guidance system	Load [N]		Load moment [Nm]		
		F _y	F _z	M _x	M _y	M _z
AXF100Z	B	11 200	16 500	175,0	900,0	560,0
	C	11 200	16 500	175,0	2 100,0	1 260,0
	D	23 750	23 750	680,0	1 100,0	1 100,0
	P	180	360	13,5	19,5	10,0

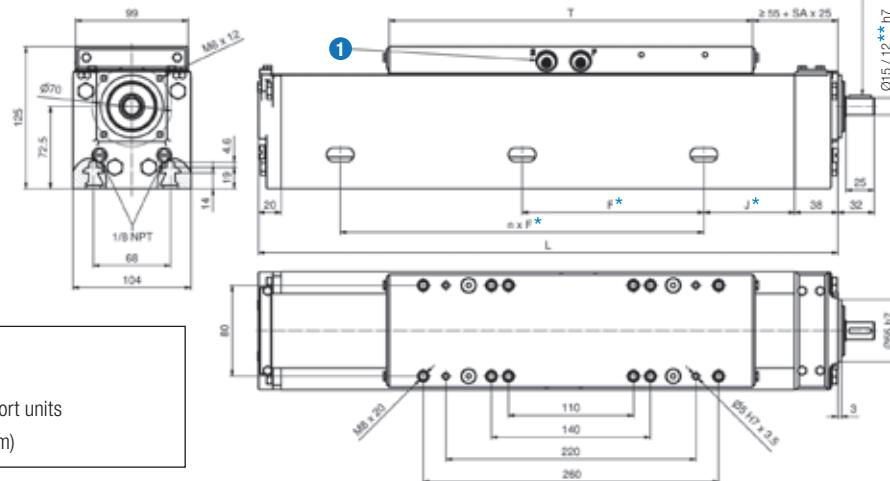

Dynamic load capacities

The dynamic load capacities of the guiding systems are based on a nominal life time of 50 000 km for the guiding systems B, C and D and 10 000 km for the guiding system P.

Type	Guidance system	Load [N]		Load moment [Nm]		
		F _y	F _z	M _x	M _y	M _z
AXF100Z	B	5 000	5 000	52	275	275
	C	5 000	5 000	52	630	630
	D	7 000	7 000	200	325	325
	P	120	240	9,0	13,0	6,5

For a tailor-made design that perfectly matches your requirements, please refer to our "Linear Modules" catalogue and contact your sales representative.

LINEAR MODULES AXF100S/AXF100T/AXF100G with screw drive

T = Table length
S = Stroke
n x SA = Number of screw drive support units
L = **T** + **S** + 80 mm (+ **n** x **SA** x 50 mm)

① Possibility of regreasing both sides

*Optional: Special measurements to be specified

**For drive system G and T

Technical data

Type	Unit	SN2505	SN2510	SN2525	SN2550
Guiding system	Guidance system D				
Table length T	mm		320		
Drive element	Ball screw				
Screw diameter	mm		25		
Pitch/Pitch direction	mm	5/right	10/right	25/right	50/right
Maximum velocity	m/min	24	48	120	150
Pitch accuracy	µm/300 mm		52		
Dynamic load capacity of the ball screw	N	19 800	16 100	12 100	15 400
Idling speed torque	Nm		0,3...2,0		
Maximum drive torque	Nm	5,2	10,0	27,0	50,0
Maximum axial operating load	N		6 000		
Moment of inertia	Kg cm ² /m	2,62	2,82	2,62	2,25
Geometrical moment of inertia (profile) I _y	cm ⁴		338,7		
Geometrical moment of inertia (profile) I _z	cm ⁴		411,8		
Maximum total length	m	5,8		6,0	
Repeatability	mm		0,03		
Efficiency		0,93		0,98	

For detailed data about AXF100T (with trapezoidal screw) and AXF100G (with sliding screw) refer to our "Linear axis" catalogue.

Static load capacities
